Flash Media Server Installation Step

6. Don't Select Apache2.2, and then click [Next] to go to next step.

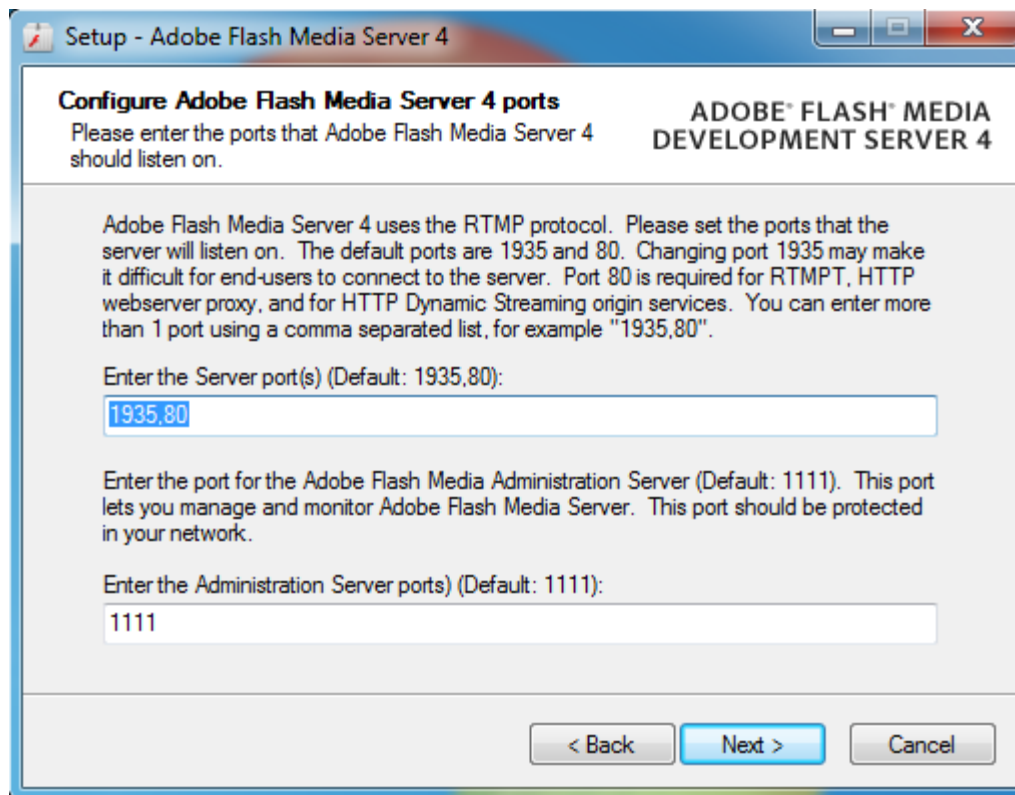

Flash Media Server Installation Step

7. Choose install location, and then click [Next] to go to next step.

Flash Media Server Installation Step

8. Please specify server ports, and then click [Next] to go to next step.

The screenshot shows the 'Setup - Adobe Flash Media Server 4' window. The title bar includes standard Windows window controls. The main content area is titled 'Configure Adobe Flash Media Server 4 ports' and 'ADOBE FLASH MEDIA DEVELOPMENT SERVER 4'. It contains instructions about the RTMP protocol and default ports (1935 and 80). There are two input fields: one for 'Server port(s)' with '1935,80' entered, and another for 'Administration Server ports' with '1111' entered. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'.

Setup - Adobe Flash Media Server 4

Configure Adobe Flash Media Server 4 ports

Please enter the ports that Adobe Flash Media Server 4 should listen on.

ADOBE FLASH MEDIA DEVELOPMENT SERVER 4

Adobe Flash Media Server 4 uses the RTMP protocol. Please set the ports that the server will listen on. The default ports are 1935 and 80. Changing port 1935 may make it difficult for end-users to connect to the server. Port 80 is required for RTMPT, HTTP webserver proxy, and for HTTP Dynamic Streaming origin services. You can enter more than 1 port using a comma separated list, for example "1935,80".

Enter the Server port(s) (Default: 1935,80):

1935,80

Enter the port for the Adobe Flash Media Administration Server (Default: 1111). This port lets you manage and monitor Adobe Flash Media Server. This port should be protected in your network.

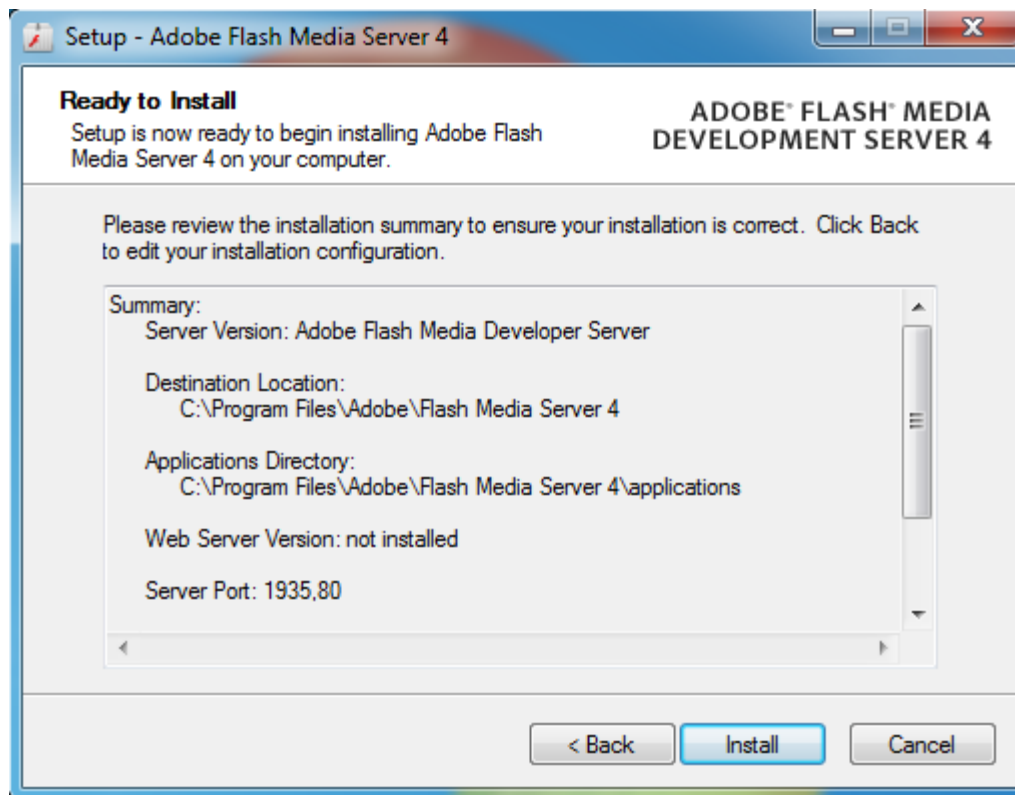

Enter the Administration Server ports (Default: 1111):

1111

< Back Next > Cancel

Flash Media Server Installation Step

9. Confirm install information page, and then click [Install] to go to next step.

Flash Media Server Installation Step

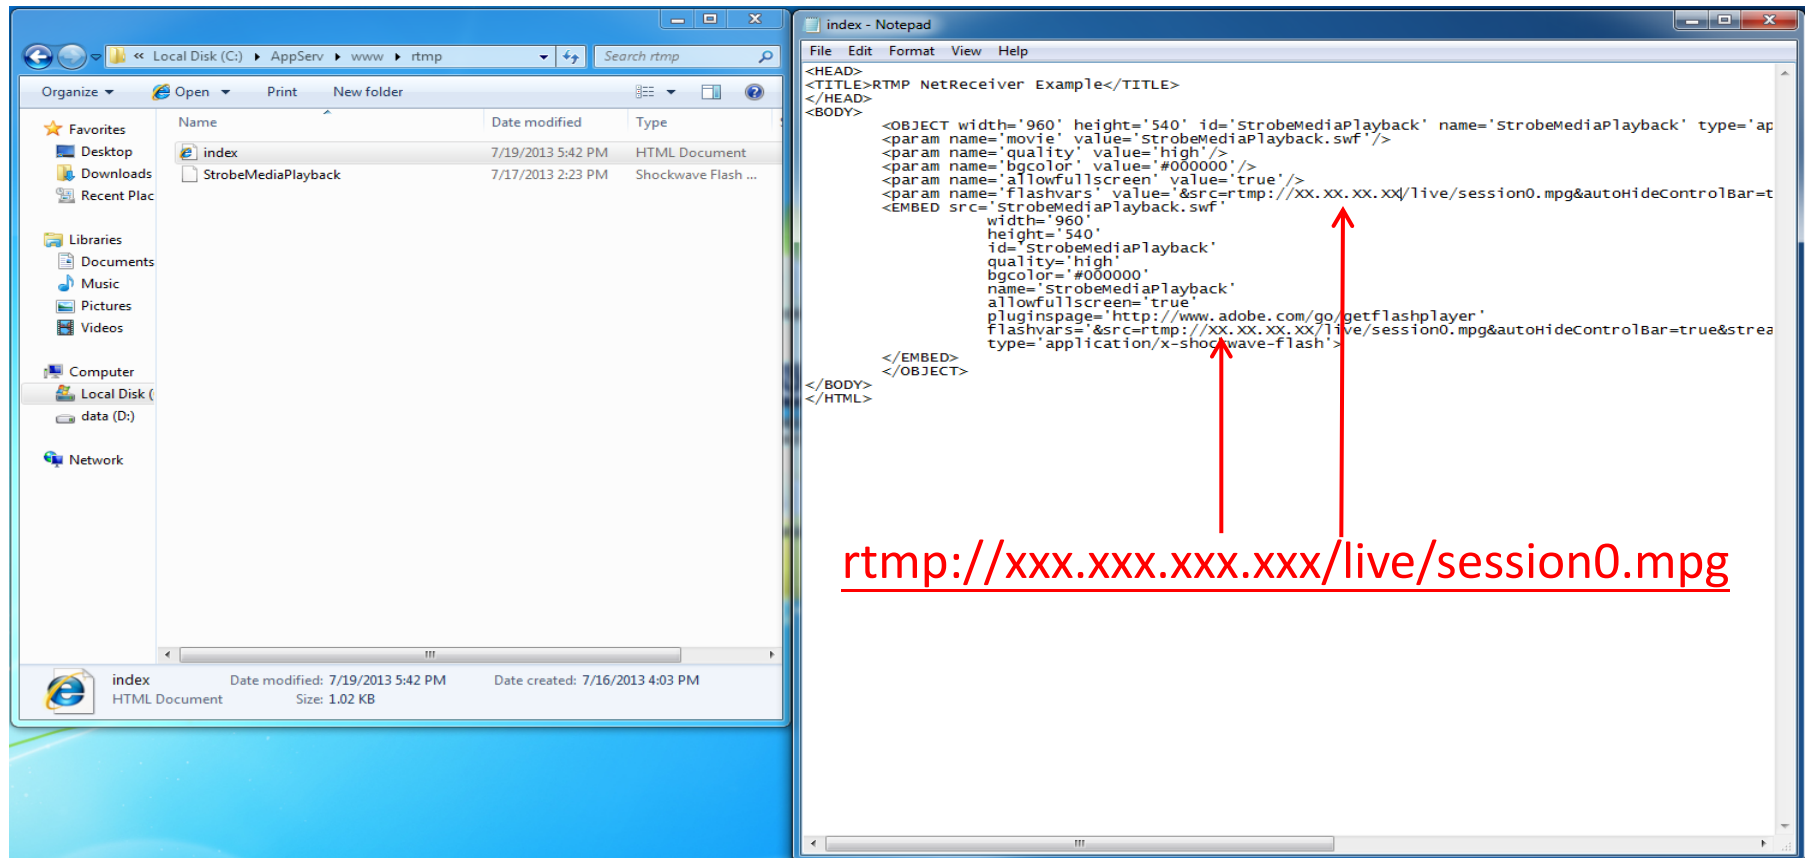

10. Complete flash media server setup , and then click [Finish] to end this setup.

Flash Media Server Installation Step

11. You need modify the default IP address on the index.htm.

For example rtmp://xxx.xxx.xxx.xxx/live/session0.mpg

Flash Media Server 4 Installation Step

12. You need add server IP address on the website.

Flash Media Server Installation Step

13. Double click NetBroadcaster.exe to run, then click [START] to create RTMP video steaming.

Flash Media Server Installation Step

14. And then you can see RTMP video streaming on website.
